

Raising Attainment in Science – CPD in Norfolk

Experience dozens of science ideas, strategies and games devised to enhance your children's natural curiosity about the world around them. Eastgate Academy in King's Lynn is working with TT Education to help raise attainment in Science amongst schools in Norfolk.

During this one-day course, you will learn strategies to manage practical enquiry in the primary classroom. We'll discuss the importance of making meaningful cross-curricular links through a powerful hook, exploring prior experience, understanding context and having a clear purpose for scientific investigation. You will return to your classroom feeling confident in your ability to develop pupils' scientific understanding and vocabulary through engaging starting points, effective questioning and talk-led, active approaches.

"This course provided a great insight into how science can be more practical and hands on. Great ideas that will certainly stir curiosity!"

John Everard, Science Co-ordinator, Shaftesbury Primary School

Course objectives / outcomes

- Develop effective strategies to manage practical enquiry
- Explore progression within scientific enquiry and improve your understanding of the 'Working Scientifically' programme of study
- Deepen your knowledge of scientific vocabulary and concepts
